

Sixteen-year-old graduates high school using NexPort Campus, is awarded university scholarship

OKLAHOMA CITY – Miami native Leora Haimov received her high school diploma at just 16 years old. She has been awarded a scholarship to the Miami International University of Art and Design.

Haimov graduated from the SACS accredited institution Career Online High School. COHS transfers credit for course credit earned at other accredited institutions. The school is part of Smart Horizons Career Online Education, the world's first private online accredited school district, which launched the program in 2012 in partnership with Cengage Learning's ed2go, the country's largest provider of turnkey online training.

Both COHS and Smart Horizons Career Online Education use the learning management system NexPort Campus developed by NexPort Solutions Group.

Haimov said the hands-on support provided by the school staff, including academic coaches, instructors, and tech support was instrumental in helping her graduate so quickly.

“I could call my instructor whenever I needed her and she was always able to help me,” she said. “I would recommend COHS to anyone because it's a great way to finish your high school years, start your major, and achieve your career goals.”

NexPort Campus is a secure, hosted learning and knowledge management system. NexPort Campus also supports interactive engagement within learning communities through the use of videos, organization-wide calendar, shared documents, organization-wide webpages and threaded discussions. Additional system features include data interoperability with external systems, secure digital libraries with subscriber-only access and an integrated Student Information System (SIS).

NexPort Campus also allows clients to provide their learners with customized, on-demand training and education environment. Clients operate within their own branded portals to deliver their unique content and services independently of each other. Customers may subdivide their portals to establish and manage subordinate secure portals for their customers, subsidiaries or divisions. Each portal provides privacy protection and security. Your custom portal can be setup with Secure Sockets Layer technology (128-bit encryption) and a custom domain.

Based out of Oklahoma City, NexPort Solutions Group enables educators and learners to use NexPort Campus to create, organize and hold webmeetings using NexPort Solutions Group's own NexMeeting. NexMeeting promotes virtual learning, providing users with the ability to share desktops, hold

conversations using headset and telephonic audio, survey meeting participants and share videos, PowerPoint slides, photos and documents using the whiteboard
