## NexPort Campus 5.0.8 Provides System Check, Faster Performance for Users

OKLAHOMA CITY – February 7, 2014 – NexPort Solutions Group today released NexPort Campus version 5.0.8. This release includes a system check option for all users and increased speed and performance. Version 5.0.8 resolved nine bugs, introduced one enhancement and two engineering tasks that increased functionality.

### General Enhancements

The software engineers developed a system check capability, available to users beginning Feb. 7. This feature, available via the link in the footer, allows users to check their current software compatibility and ensure they have the latest versions of the software required for the best performance of NexPort Campus. The list provides users with a simple list, with green checkmarks indicating the user has the current software installed on the computer and a red X letting the user know they need to either install or update the software. Any user can conduct a system check at any time while using NexPort Campus.

### Performance Enhancements

Many administrators and system operators use a group tree within organizations. This tree allows them to jump from group to group seamlessly. However, prior to the 5.0.8 release, some users were experiencing lag time in the loading of the group tree. The delay in loading group tree is now much quicker and eliminates almost all delay in loading the tree. Users can now use the group management tree and sharing tree for course sets and catalogs swiftly and efficiently.

### Major Bugs Fixes

NexPort Campus software engineers sought to improve any glitches within the system. This included making fixes to nine bugs. Engineers resolved a reporting error some users were experiencing when loading large data with few filters. Users had also experienced subscription

status tool bugs, which are no longer an issue in the 5.0.8 release. NexPort engineers also remedied an issue with section enrollments, which prevented the enrollment from being updated after the section was completed and passed if the training had been modified. Users will no longer experience this issue as of Feb. 7. Users are encouraged to contact customer support if they experience any of these issues or need to report any other bug within the system. NexPort Campus prides itself on serving customers and providing those continuing their education and training with a simple and trouble-free process to do so.

### **About NexPort Campus**

NexPort Campus is a secure, hosted learning and knowledge management system. NexPort Campus also supports interactive engagement within learning communities through the use of videos, organization-wide calendar, shared documents, organization-wide webpages and threaded discussions. Additional system features include data interoperability with external systems, secure digital libraries with subscriber-only access and an integrated Student Information System (SIS).

NexPort Campus also allows clients to provide their learners with customized, on-demand training and education environment. Clients operate within their own branded portals to deliver their unique content and services independently of each other. Customers may subdivide their portals to establish and manage subordinate secure portals for their customers, subsidiaries or divisions. Each portal provides privacy protection and security. Your custom portal can be setup with Secure Sockets Layer technology (128-bit encryption) and a custom domain.

NexPort Solutions Group enables educators and learners to use NexPort Campus to create, organize and hold webmeetings using NexPort Solutions Group's own NexMeeting. NexMeeting promotes virtual learning, providing users with the ability to share desktops, hold conversations using headset and telephonic audio, survey meeting participants and share videos, PowerPoint slides, photos and documents using the whiteboard.

### **About NexPort Solutions Group**

*NexPort Solutions Group is a division of Darwin Global Enterprises, a systems and software engineering company that provides innovative, cost-effective training solutions and support for federal, state and local government, as well as the private sector.*
