NexPort Reporting Services 1.1.4 Increases Performance, Speed and Functionality

OKLAHOMA CITY – February 7, 2014 – NexPort Solutions Group today released NexPort Reporting Services version 1.1.4. This release provides users with increased speed and performance. Version 1.1.4 resolved eight bugs and introduced one engineering task that increased functionality by providing faster comparison report loading for users.

Performance Enhancements

With NRS 1.1.4, users will benefit from faster comparison report loading. Comparison reporting provides users with the ability to conduct pace comparison, completion comparison and transcript comparison. Administrators and instructors can make a custom report of pace comparison, which reports the number of students who are either behind, on or ahead of pace within that group. Users can also take advantage of completion comparisons report enrollment by completion status and/or graduation trends for a group or a training plan. They are also able to create transcript reports. Transcript reports provide the number of sections that have been fulfilled by a transcript, the percentage of evaluations completed, the transcripts that require evaluation and the transcripts that have completed evaluations.

Each of these reports load faster in 1.1.4.

Major Bugs Fixes

Users will benefit from several other fixes introduced in version 1.1.4. The "End on Date" functionality now works correctly in scheduled reports. Some users who were being inadvertently logged out while viewing and editing schedules will no longer experience this problem. Finally, NexPort Reporting Services users will also be able to save a report without receiving an error. NexPort Reporting Services users will also be able to save a report without receiving an error. All of these bugs were addressed in 1.1.4 released today.

About NexPort Reporting Services

NRS offers fast-loading adhoc and comparison reports with detailed help documentation. NRS employs,Solr, a super-fast full-text search and indexing database. This allows NRS to produce reports on large sets of student data quickly and reliably. Reports are presented in a compact tabular display that offers innovative human-readable filters within the Custom Report Builder. The Custom Report Builder allows NRS users to filter and display all mapped data from NexPort Campus.

Training plan enrollment reporting allows users access to pacing data, with assignment status and transcript reporting also available. Users are able to save and share custom reports with permitted users in a group, as well as set reports to send to select users' email addresses on a schedule. The scheduled report email notifications can be set up using the flexible scheduling interface. Permitted users may also save, view and/or download reports any time. Reports are also auto-saved for each report type within NRS, so even if you forget to save your report, a saved version is available. NexPort users now also have the capability to convert previously created NexPort Campus reports into an NRS report. NRS also provides users with comparison reports, which allow the user to compare pacing, comparison and/or transcript data for members of a group. Comparison reports allow the user to focus on specific student data in the comparison. Users are also able to save a group to their "Favorites" for easy loading of comparison data.

NexPort Solutions Group

NexPort Solutions Group enables educators and learners to use NexPort Campus to create, organize and hold webmeetings using NexPort Solutions Group's own NexMeeting. NexMeeting promotes virtual learning, providing users with the ability to share desktops, hold conversations using headset and telephonic audio, survey meeting participants and share videos, PowerPoint slides, photos and documents using the whiteboard.

About NexPort Solutions Group

NexPort Solutions Group is a division of Darwin Global Enterprises, a systems and software engineering company that provides innovative, cost-effective training solutions and support for federal, state and local government, as well as the private sector.
